Stay Up-to-date With The Latest Technologies And Industry Trends

Keep your business at the forefront of innovation and competitiveness by staying up-to-date with the latest advancements in technology and industry trends. Our commitment to continuous learning and integration of emerging technologies ensures that your business leverages the most relevant tools and strategies to stay ahead of the curve. By remaining informed about industry developments, we empower your organization to make informed decisions and adapt proactively to changes, thereby maximizing opportunities for growth and success in a rapidly evolving business landscape.

Discover Our Best Services

Software Development

Our software product development services encompass architecture modernization, AI-assisted development, and all related areas, offering comprehensive solutions tailored to your needs.

Quality Assurance

Quality Assurance (QA) is a critical aspect of software development, ensuring that applications meet high standards of performance, functionality, and user experience.

DevOps Services

Explore new horizons in business value and turbocharge your productivity with our DevOps services, breaking away from conventional approaches to market penetration and achieving accelerated growth.

Experience Design

Evaluating the user experience from beginning to end in order to determine where enhancement efforts should be focused.

Software Maintenance

Our dedicated support team provides proactive monitoring, incident management, and resolution to maintain optimal performance and availability.

Cloud Native Services

GT InfoTech's Transformation Services drive innovation through hybrid cloud infrastructure, cloud-native solutions, and cutting-edge technologies like security measures, data analytics, AI, machine learning, IoT, and blockchain services.

Staff Augmentation Services

Get instant access to top talent with GT Infotech's Staff Augmentation. We seamlessly integrate skilled professionals into your team, boosting productivity and flexibility. Scale your workforce efficiently and drive business success.

Case Study

A Finland based energy sector company had engaged GT InfoTech to develop a desktop-based application to keep track of energy meters shipping from various warehouses to desired retail locations.

Problem statement

Company's manual shipment tracking was the bottleneck to seamless package and pallet tracking, so the company wanted to automate the process using modern technologies.

Solution

PackTra was developed using Microsoft Tech Stack, which is windows-based Application connected to API endpoints that gather inputs from warehouse workers and generate barcodes and labels. Package and pallet label printing could be done using PackTra software, and the cloud-based SQL database could store information about packages and pallets.

Microsoft PowerBi reports were used to generate user-friendly audit reports to display historical data on sales activity.

The Microsoft Azure cloud ecosystem was used to host various APIs and endpoints, which gave us flexibility to scale the system on demand.

Overall, PackTra was a hit solution and budget-friendly too.

Case Study

Simpluris Inc., a Florida-based leading class action settlement company engaged GT InfoTech to modernise the application called AdminApp.

Problem statement

AdminApp was made with Microsoft ASP.NET. It was not performant enough to solve complex business logic, and the app's performance was too slow.

Solution

GT InfoTech arch and dev teams had to work together to redesign the app with an API and the latest version of Angular. In fact, this is a long-running project, and we managed to move to production incrementally, and we see a significant improvement in the app's performance. AdminApp Microservice architecture helps scrum teams work independently, adding value to business.

AdminApp is another successful project under the GT InfoTech umbrella.

Raj S. R
Business Head

Leadership

Raj S.R. aka Raja, Business Head, Who is responsible for GT InfoTech overall business. He has around fourteen years of experience in technology and specializes in Microsoft tech stack. Raj has experience in both software service and product areas which helps the company to focus on both verticals. Before GT Infotech Raj worked for various IT companies and he provided technical solutions that are still fundamental to companies. More info about Raj can be found on [LinkedIn](#).
